

AUTO POP-UP COUNTER ASSEMBLY INSTRUCTIONS

1 PLACE COUNTER ON FLOOR OR TABLE THEN SLIDE COVER OVER FRAME

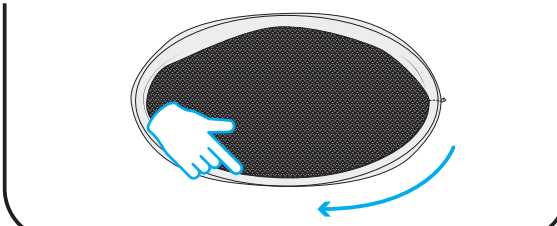

Place the Counter Frame, in the **closed position**, on the floor or table. Slide the printed cover over the frame.

2 LINE UP VERTICAL SEAM OF COVER WITH CENTRE OF SHORT SIDE OF THE FRAME

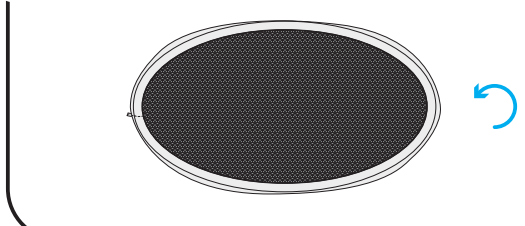

Line up the vertical seam with the centre of the short side of the counter (top and base). This will ensure the print is centred correctly.

3 PRESS ELASTIC CORD INTO COUNTER-TOP GROOVE - TRY NOT TO STRETCH

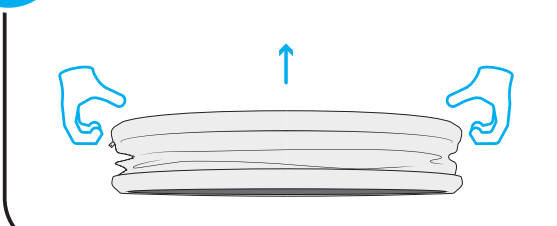

Starting at the vertical seam, gently press the elastic cord (sewn into to top and base edges of the cover) into the groove around the outside of the counter top/base, moving your way around until the cover is secured.

4 REPEAT STEP 3 FOR OTHER SIDE OF THE COUNTER

Turn the counter over and **REPEAT STEP 3** for the other side of the counter.

5 FACE COUNTER TOP UPWARDS - LIFT TO AUTOMATICALLY RAISE

When both sides of the print are tucked into the top and base grooves, turn your counter so the top is facing up.

Then gently lift the table top from underneath and watch your counter automatically rise to the **open position**.

6 ATTENTION! REMOVE PRINTED COVER PRIOR TO PACKING AWAY

IMPORTANT! REMOVE THE PRINTED COVER PRIOR TO PACKING AWAY TO AVOID DAMAGING THE FABRIC.

TO PACK AWAY: Press down firmly on counter to return the Auto Pop-Up Counter Display to the **closed position**.
